Job Objective

Recent graduate with a BSc in Computer Information Systems, seeking a junior QA position where I can apply my knowledge and skills in software testing, quality assurance methodologies, and bug tracking. A dedicated and detail-oriented worker with hands-on experience from internships, I am motivated to help achieve company goals and take on additional responsibilities as quickly as possible, contributing to continuous improvement.

Education

- Bachelor of Computer Science, Minor in Computer Information Systems (ABET-Accredited), Jordan University of Science and Technology, 2024
GPA: 3.78/4.0 (Excellent)

Work Experience

QA Trainee, The Learning Hub, (Oct. 2024 – Present)

- Currently developing skills in QA fundamentals, including manual testing, automation with C# and API testing.
- Gaining hands-on experience with databases and learning web technologies to support comprehensive testing approaches.
- Actively learning how to write and execute test cases, track defects, and ensure software meets quality standards.
- Collaborating with team members to improve testing processes, with a focus on increasing efficiency and quality.
- Gaining exposure to real-world testing challenges, including understanding both manual and automated testing practices.

Courses

- Cyber Warriors, National Cyber Security Center, Feb. 2023
- Software Quality Assurance Engineering, The Training Center at PSUT, 80 Hours, Sep. 2024
- Communication in Business, Coach You, Nov. 2024

Skills

- **Computer Skills:**
