About me

As a motivated Junior Quality Assurance Engineer, I have developed a solid foundation in both manual and automated testing, utilizing tools like Selenium WebDriver, Appium, TestNG, and Postman. Though I am just starting my career, I am passionate about ensuring high software quality in web, mobile, and API environments. My understanding of database testing, performance testing with JMeter, and automation scripting in Java equips me to quickly adapt and contribute to any QA team. I thrive in collaborative settings and am eager to apply and grow my skills to help deliver reliable, bug-free software.

Education

- Quality Assurance trainee at PSUT (manual and automation testing 80hour)
- Bachelor of Computer Science - The World Islamic Science & Education University – 2022

Experience

Internship Quality Assurance at PSUT (jun2024-Aug2024)
