SUMMARY

I have extensive experience in Flutter and Dart, with strong proficiency in iOS (Swift, Objective-C). I've completed diverse projects and have deep expertise in Firebase, API technologies, and Figma for user experience. My experience with UIKit and Storyboard includes working on complex iOS projects.

PROFESSIONAL EXPERIENCE

Flutter Developer | Smart Steps, Jodan - Amman   **Sep - Nov, 2024**
- Ma'an Application: UI, API.
- Modifying on Kitchens Application.

Ios Developer Trainee | Ihorizons, Qatar- Doha   **Feb - Aug, 2024**
- I worked extensively on a fuel application project, gaining important skills and valuable experience. Collaborating closely with a team under pressure and tight deadlines was rewarding. I built a fully integrated project using Storyboard and also learned the basics of Swift UI, gaining an understanding of its core concepts and principles.
- I have worked on various tasks, including dealing with protocols, extensions, and other important topics.

Flutter Developer Trainee | Orange Digital Center, Jordan - Amman   **Jun - Aug, 2023**
- I worked and trained at the Orange Digital Center, where I built two robust projects and gained valuable skills and experience, I worked with Google Maps and explored various related topics.
- Every day, I tackled challenging tasks and significant projects, including integrating APIs and Firebase. This unique experience allowed me to work with powerful technologies like Trello and Figma, among other important tools.
- I collaborated with a team of 5-6 people to build a comprehensive application for university students and recent graduates. We followed the SDLC methodology held daily meetings and completed tasks.

Flutter Developer Trainee | The Hope International, Jordan - Amman   **Apr - Aug, 2022**
- I trained and worked on projects using Flutter and Dart, gaining strong skills and valuable experience through intensive training.
- I have worked on numerous projects and aspire to achieve even more, embracing new challenges. The training was intense and rigorous, Involving work with APIs, Firebase, and effective project state management.

- **Flutter Package: c_material colors Include all colors, Click Here.**
